code-with-samzy.netlify.app · x.com/codewithsamzy

PROFESSIONAL SUMMARY

Full-stack developer with 5+ years of experience building production-ready web applications. Proficient in React, Next.js, TypeScript, Node.js, Python and PostgreSQL, with hands-on experience in authentication, payments, third-party API integrations and automated testing. Security-minded engineer (ISO/IEC 27001 Lead Auditor) who ships products that are fast, functional and secure.

TECHNICAL SKILLS

Frontend	React, Next.js, TypeScript, Angular, Vue.js, Redux, HTML5, CSS3, Bootstrap, Vite
Backend	Node.js, Express.js, REST APIs, OAuth, PostgreSQL, MongoDB, Prisma, Drizzle ORM, Neon DB
Security	Penetration Testing, OWASP Top 10, Burp Suite, Nmap, Nikto, SSLscan, Wireshark, Metasploit, OSINT, Threat Intelligence, Risk Management
DevOps & Tools	Git, Docker, Railway, Netlify, Vercel, Mapbox, Stripe, Resend, Unit & E2E Testing, Cisco Packet Tracer
Languages	JavaScript, TypeScript, Python

EXPERIENCE

Full-Stack Developer · CodeWithSamzy · Freelance

2023 — Present

- Designed and shipped full-stack web applications for clients across multiple industries
- Built a rental application platform with Mapbox address autocomplete, Stripe payment processing, Resend email workflows via custom domain, and Neon PostgreSQL — deployed on Railway
- Built SecureVault: AES-256 encrypted password manager with HaveIBeenPwned breach detection and JWT auth
- Built Vantra: project and task management SaaS on Next.js, Prisma and PostgreSQL, with authentication and account-level data isolation
- Built GitHub Wrapped: GitHub-connected year-in-review app with animated stat cards and a shareable image, using read-only access and storing nothing beyond the session
- Built Cache Sentry: passive Chrome extension that flags web cache deception signals from response headers, covered by unit and headless-Chrome end-to-end test suites

React Next.js Node.js TypeScript PostgreSQL Prisma Railway Stripe Mapbox

Penetration Tester · Client — Authorized Security Audit

2024

- Conducted full-scope authorized penetration test on a production web application using Kali Linux
- Ran structured reconnaissance with Nmap, SSLscan, Nikto, and DNS brute-force enumeration
- Identified critical findings: missing HTTP security headers, server version disclosure, backend subdomain leakage via CSP headers, publicly exposed SSH, and SSL/TLS misconfigurations
- Delivered a detailed findings report with severity ratings and actionable remediation recommendations

Nmap Nikto SSLscan Kali Linux DNS Enumeration Report Writing

Frontend Developer · Shankstix Media & Software Company

2023 — 2024

- Built the Shankstix React frontend from scratch including auth flows, JWT token management, and API integration
- Implemented event creation functionality and debugged backend connectivity issues across a custom subdomain architecture

React TypeScript JWT REST APIs

Frontend Developer · New Horizons Institute

2020 — 2023

- Collaborated with the design team to transform wireframes and mockups into interactive, responsive user interfaces
- Built and maintained frontend components across multiple client projects

HTML CSS JavaScript React

KEY PROJECTS

Vantra vantra-pi.vercel.app

Project and task management SaaS for small teams, with user authentication, account-level data isolation and access control, built around a clean one-view workflow.

Stack: Next.js 16, Prisma, PostgreSQL, Vercel

GitHub Wrapped githubwrapped-app.vercel.app

Year-in-review web app that connects to GitHub, reads the last 12 months of contributions and turns them into animated stat cards, a contribution heatmap and a shareable image. Read-only access, with nothing stored beyond the session.

Stack: GitHub OAuth, GitHub API, Vercel

SecureVault github.com/CodeWithSamzy/securevault

AES-256 encrypted password manager with breach detection via HaveIBeenPwned API, real-time password strength analysis, and JWT authentication.

Stack: React, Node.js, TypeScript, Neon PostgreSQL, AES-256

Cache Sentry github.com/CodeWithSamzy/Cache-sentry

Passive Chrome extension that flags potential web cache deception by analysing response headers on requests carrying session cookies, with false-positive filtering, per-tab findings and JSON export. Includes a unit suite and a headless-Chrome end-to-end suite.

Stack: JavaScript, Chrome extension (service worker), Node.js, Chrome DevTools Protocol

CERTIFICATIONS

- **ISO/IEC 27001:2022 Lead Auditor** — Mastermind Assurance
- **Cybersecurity Analyst** — Cisco Networking Academy
- **Cyber Threat Management** — Cisco
- **Cybersecurity Analyst Explorer** — OPSWAT Academy
- **Mastercard Cybersecurity Virtual Experience** — Forage — Security Awareness Team Simulation
- **Frontend Developer** — New Horizons Institute

EDUCATION

B.Sc. Physics · Lagos State University (LASU)

2023 — Present

- Currently studying General Physics alongside active professional development in software and security

Frontend Development & Cybersecurity Training · New Horizons Institute

2020 — 2023

- Completed intensive training in frontend development and cybersecurity fundamentals

ADDITIONAL

- Actively sharing cybersecurity tips and security awareness content on X (@codewithsamzy) — 430+ followers
- Completing PortSwigger Web Security Academy labs — Web Cache Deception, SQLi, XSS, CSRF, SSRF, Auth Bypass
- Open to remote full-stack, frontend and software engineering roles
